

Faculty Review of Open eTextbooks

The [California Open Educational Resources Council](http://www.cool4ed.org) has designed and implemented a faculty review process of the free and open etextbooks showcased within the California Open Online Library for Education (www.cool4ed.org). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected free and open etextboks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Please provide comments on any aspect of the subject matter of this textbook:

- I reviewed an educational psychology textbook by Kelvin Seifert for a course on Child Growth and Development (CDEV 100). In this reviewer's opinion, this textbook is not an appropriate fit for an introductory child development course. It is lacking a discussion of the fundamentals for this course, including developmental research methods, prenatal development and birth, the role of heredity and environment, and a chronological description of the various forms of development from birth to adolescence. There is a section on student development that briefly covers physical, cognitive, social, and moral development, but it is not sufficient for the course. With that said, my low ratings above reflect a poor fit of the textbook for this specific course and are not a reflection of the content of the material for a course on educational psychology.

Total Points: 7 out of 35

Please provide comments on any aspect of the instructional design of this textbook:

- Again, because this is an educational psychology textbook and I am reviewing it for a child development course, the ratings are low. The textbook is not organized in a coherent way for a child development course.
