

Faculty Review of Open eTextbooks

The [California Open Educational Resources Council](http://www.cool4ed.org) has designed and implemented a faculty review process of the free and open eTextbooks showcased within the California Open Online Library for Education (www.cool4ed.org). Faculty from the California Community Colleges, the California State University, and the University of California were invited to review the selected no/low cost and open eTextbooks using a rubric. Faculty received a stipend for their efforts and funding was provided by the State of California, the William and Flora Hewlett Foundation, and the Bill and Melinda Gates Foundation.

Overall Comments

If you were to recommend this textbook to colleagues, what merits of the textbook would you highlight?

- I have never used a book that has taken a nonstandard approach like this before.
- I'm sure I would pick up some tips for teaching microeconomics if I adopted this book, and it would be interesting to view the material from the different perspective this book offers.

What areas of this textbook require improvement in order for it to be used in your courses?

- The test bank does not seem to match the book.
- Moreover, the fact that it is a nonstandard text makes me much less willing to adopt it.
- Despite the fact that some instructors might see this as a virtue, I am a traditionalist when it comes to micro principles textbooks.
